I-PLUG BIO

SINGLE USE TEMPERATURE DATA LOGGER

- Single or Multi-Use
- Plugs directly to any USB port
- Self generated pdf report
- Multi alarm LED indicators
- Send and store data to the web

I-PLUG BIO

is a single or multi-use temperature data logger. Available in 2 versions, with LCD display or 4 LEDs indicators, iPlug bio creates automatic pdf report once connected to a computer.

Equipped with 4 programmable alarms level to enable user immediate decision iPlug bio can also be used with **DATAFLOW** a powerful software that complies with the FDA CFR 21 part II.

As per IATA's 2017 - 58th Edition about Lithium Ion/Metal Batteries - These devices do not require additional labeling and are considered "non dangerous goods"

ITTi

TIME-TEMPERATURE
INDICATOR

SINGLE USE TIME TEMPERATURE INDICATOR

- Pre- programmed
- Checks temperature at regular time intervals.
- LED warning light for critical limits.

ITTi
TIME-TEMPERATURE
INDICATOR

is a Low cost multi alarm time-temperature indicator.

It allows users to take immediate decision linked with temperature excursions. For logistics or storage, it is a reliable and affordable solution for temperature monitoring.

Extremely efficient, it has an operating time of up to 1 year and has 2 individually programmable alarms

As per IATA's 2017 - 58th Edition about Lithium Ion/Metal Batteries - These devices do not require additional labeling and are considered "non dangerous goods"

SWITTRACE

I-PLUG_{pdf}

DRY ICE LOGGER

SINGLE USE DRY ICE DATA LOGGER

- Single use only.
- Low temperature limit : -80°C
- Suitable for shipments with dry ice (biological samples, blood etc)

I-PLUG_{pdf}

DRY ICE LOGGER

is ideal for shipments of biological samples at extreme low temperature (-80°C/-112°F)

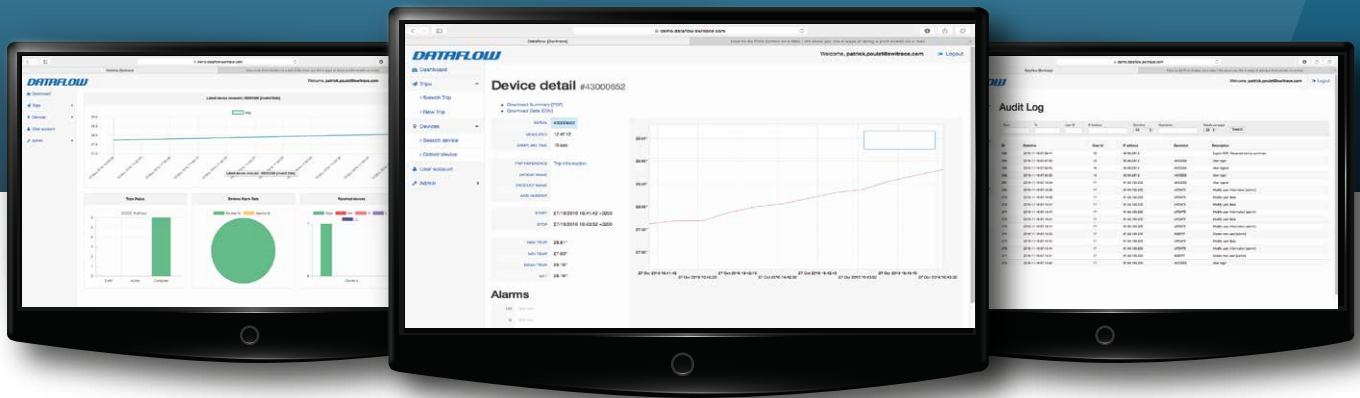

A single use only device, it will last for 30 Days
It does not have a probe and can be placed nearby sensitive products.

It generates an automatic pdf report and shows alarms thanks to its 4 LEDs.

As per IATA's 2017 - 58th Edition about Lithium Ion/Metal Batteries - These devices do not require additional labeling and are considered "non dangerous goods"

DATAFLOW

Temperature Monitoring Software

DATAFLOW is a user friendly online database software that allows companies to manage critical time and temperature information.

Users can easily share information within its FDA 21 part II compliant environment. Users and actions are fully traceable, as each customer's database is saved in a fully secured environment.

DATAFLOW software allows you to combine valuable logistic information with the time and temperature recordings. Useful cold chain analytics and reports can be extracted from the database.

FOR USE WITH ALL OF SWITRACE'S DATA LOGGERS
